

17:00 - 20:00 - FSDI 101 Session #1 Cohort 29

- We can use the ! (emmet abbreviation) it creates the HTML structure.
- The comments are ignored by the browser (<! - - this is a comment - - >)
- We have 6 types headings from h1 to h6
- use tagnames inside other tags.
- We were creating the Github account and repository.
- the tag names structure the text.
- use lorem for creating random text.
