

## 9:00 - 12:00 - FSDI 104 Session #3 Ch29

---

- JS can select element by TagName, ClassName, Id and `querySelector()`.
- The `querySelector()` can select as CSS: `#` → id , `.` → class , `htmlElement` → tag.

### AND &&

Think in a login situation

True	True	True

False	True	False
False	False	False

### OR ||

think in a search function

True	True	True
True	False	True
False	True	True
False	False	False

### Display pets algorithm

1. Create on the HTML a section or div or table, assign an ID.
2. The pets are `salon.pets[]`, travel the array.
3. Create a template or card with HTML code.
4. Append the card to the section that was created.
