

- Inline has preference over the others
  - Internal quick fix for long code.
  - External is the best practice and you can use it in multiple HTML. This one needs to be link using the shortcut link:css
- 
- Use boxes such as header and main to help you grouping the elements and improve the style.
  - Symbols
    - : = colon
    - ; = semicolon
    - < or > = angle bracket
    - " = double quote
    - ' = single quote
    - = asterisk
    - ` = grave
    - ~ = tilda
    - [ or ] = square bracket
    - { or } = curly brackets
